

# Czech Rep.

## Postcode

### Postcode type and position

5 digits to the left of locality name; 1 space between 3rd and 4th digits; 2 spaces between code and locality name.

### Coding method

1 0 0 0 0

### Position of the address on the envelope

Bottom right-hand corner

### Alignment of address lines

Left-aligned

### Address format

The addresses of certain major cities, such as Prague or Brno, contain a one to three figures code after the locality name (e.g. PRAHA 11) which identifies (together with the locality name) the delivery post office.

Either name of delivery post office or name of locality may be given in the address beside the postcode. If delivery post office name is used and it is different from the locality name then the locality name will appear on the line above the postcode.

The street number often consists of two numbers separated by a slash. The first number is a unique district-related building number which doesn't depend on the street where the building is located, the second number is the street number;

## Examples

Address with delivery office name:

Pan Martin Parma  
Hrušovská 455/10  
102 00 Praha 102  
CZECH REP.

*street + premises
